CORE COMPETENCIES

Programming Languages: Core Java, Python
Architecture & Design: OOPs, SOLID Principles, Data Structure and Algorithms, Design Patterns
Frameworks: Spring Framework, Spring Boot, Spring Security
Database: SQL, JDBC, Redis, h2
Cloud: AWS, GCP, Azure
Back-end Technologies: JDBC, RESTful APIs, Microservices, Hibernate, Encryption, JWT

Front-end Technologies: React.js, Bootstrap, HTML, CSS, JavaScript
Testing: Junit, Selenium
Workflow Methods: Agile, Scrum, Waterfall
Integration & API Management: SoftwareAG webMethods, APIGEE
AI Agents: RAG, Ollama, Claude Code, GitHub Copilot

Messaging Platform: Apache Kafka

DevOps & Version Control: Git, Docker, GitHub Actions, Jenkins, CI/CD Pipeline

EDUCATION

B.Tech. in Mechanical Engineering
Haldia Institute of Technology (MAKAUT)
2021 | DGPA: 8.72

ACHIEVEMENTS

- Zonal Winner, Neural Networks workshop — IIT Kharagpur
- Design Head & Captain, Team Vidyut (2018–2021), Eastern India's only go-kart team

CERTIFICATION

- **Redis Certified: Associate Software Operator**

PROFILE

Backend-focused software engineer with 4 years of experience in Java, Spring Boot, RESTful APIs, GenAI and Microservices, including enterprise delivery at Cognizant and freelance. Skilled in performance optimization, API management, and cloud-integrated back-end solutions, with a track record of improving system efficiency and delivering scalable, production-ready applications.

WORK EXPERIENCE

Java Developer
Jun 2024 – Jun 2026

Freelancing – Kolkata, India (Remote)

- **Refactored legacy codebases** to enhance maintainability and system stability, **reducing build failures by 30%** and improving developer productivity.
- **Help build LLM-based chatbot** to automate client requirements and queries.
- Contributed to **building an online skill assessment platform** that supports automated technical tests, candidate evaluation, and analytics dashboards.
- Designed and **developed enterprise backends** for marketing and corporate platforms.
- Played a key role in **improving system reliability** by **implementing comprehensive unit tests** and **automating test workflows**, significantly reducing production issues.

Programmer Analyst
Oct 2021 – May 2024

Cognizant Technology Solutions - Kolkata, India

- Developed enterprise applications using **Java, Spring Boot, Spring MVC, JDBC, and JUnit,** improving back-end performance for scalable business systems.
- **Implemented RESTful APIs** enabling secure communication and seamless data exchange across integrated enterprise systems.
- **Automated business workflows** and streamlined system integration using SoftwareAG webMethods.
- **Configured API management solutions** in APIGEE to strengthen API security and support enterprise integration requirements.
- **Optimized SQL database queries** and maintained data integrity, ensuring consistent application performance across environments.

PROJECT

Transactions for Credit Card System
May 2023 – Apr 2024

- Migrated legacy Spring applications to Spring Boot, improving scalability and maintainability.
- Developed RESTful APIs for seamless service integration across the application.
- Designed object-oriented components to streamline transaction processing and third-party integrations.
- Configured Apigee policies to regulate API traffic and prevent abnormal requests.
- Optimized database queries, reducing validation time by 35%.
- Implemented Apache Kafka for reliable asynchronous communication across microservices.
- Executed CI/CD pipelines through Jenkins on GCP, accelerating feature deployment.
